Personal Summary

Third-year Computer Science undergraduate at Bina Nusantara University with experience in digital forensics and reverse engineering through Capture the Flag (CTF) competitions with PETIR Cyber Security. Seeking to apply forensic tools development to digital forensics, incident response, and penetration testing.

Education

Bina Nusantara University | 2024 - Expected 2028

Bachelor of Computer Science | GPA: 3.94/4.00

Achievements

Top 3 Singapore Cyber Conquest | Oct 2026 | Cyber Security Agency of Singapore

Top 3 C.O.D.E Challenge CTF | Aug 2025 | Universitas Telkom Surabaya

Top 5 CTF COMPFEST 18 | Sep 2026 | Universitas Indonesia

Finalist Country-to-Country CTF (C2C) Cybersecurity Challenge Aug 2026 | International Cyber Security - Center of Excellence (INCS-CoE)

PORSIMAPTAR XXVI | Oct 2026 | Akademi Kepolisian

Finalist and Best Writeup ACE CTF | Sep 2026 | Universitas Diponegoro

Finalist Rise the Ranger Attack & Defense | Sep 2025 | Satuan Siber TNI

Finalist ITFest CTF | Aug 2026 | Institut Pertanian Bogor

Top 250 of 2,500+ teams Samsung Innovation Campus (SIC) Batch 6 | May 2025

Experience

PETIR Cyber Security | June 2025 - Present | Member

Competed with PETIR in national and international CTFs, working with teammates mostly on digital forensics, web exploitation, and reverse engineering challenges.

Contributed to team practice sessions by developing digital forensics challenges while independently studying forensic techniques.

Selected Projects

TraceReader | HDFS Log Anomaly Detection

HDFS log anomaly detection for an 11M+ line dataset. Trained and tuned the model and helped build the Streamlit app frontend and backend.

FloodCast | Flood Prediction - DKI Jakarta

Monthly flood prediction using rainfall, seasonality, and lagged climate indicators. Trained and tuned a Random Forest model and contributed to the Flask app frontend and backend.

PETIR REGEN 2026 | CTF Challenge Development

Designed and built digital forensics and AI CTF challenges end to end for the qualifying round.

taptap | Smart NFC Business Card

Contributed directly to product development for customized NFC cards aimed at students and business owners.

Skills

Programming languages: Python, C, SQL

Cybersecurity: Digital Forensics, Log Analysis, Network Traffic Analysis, Reverse Engineering, OSINT

SIEM: Splunk, Elastic Security

Security tools: Wireshark, Ghidra, Autopsy, FTK Imager, JADX, Burp Suite

Development tools: Git, GitHub, VMware
