

Dominicius Francis Ang Gunadi

Jakarta, Indonesia | francis.gunadi@gmail.com | LinkedIn | GitHub

PROFILE

BINUS Computer Science student focused on digital forensics and reverse engineering. Competes in national CTFs with PETIR Cyber Security and builds applied machine learning tools.

EDUCATION

Bina Nusantara University | Computer Science | 2024-2028 expected | GPA 3.96/4.00

ORGANIZATION

PETIR Cyber Security | Member | June 2025-present

Designed and built two PETIR REGEN 2026 qualifier challenges end to end: one digital forensics and one AI.

Competes in national CTFs with teammates, focusing on digital forensics and reverse engineering, with additional web exploitation work.

SELECTED PROJECTS

TraceReader | Trained and tuned an HDFS anomaly model on 11M+ log lines; helped build the Streamlit frontend and backend.

FloodCast | Trained a Random Forest model for monthly DKI Jakarta flood prediction (AUC 0.724, F1 0.687); contributed to the Flask app.

MoneyTalks | Trained a seven-denomination rupiah recognition model and helped build the Flask camera-to-speech app.

PETIR REGEN 2026 | Designed and built digital forensics and AI CTF challenges for the qualifying round.

RECOGNITION

Top 5 / Honorable Mention | CTF COMPFEST 18, Universitas Indonesia

Finalist | Singapore Cyber Conquest, Cyber Security Agency of Singapore

Finalist | Country-to-Country CTF (C2C) Cybersecurity Challenge 2026

Best Writeup | ACE CTF 2026, Universitas Diponegoro

Bronze | C.O.D.E Challenge CTF 2025

Top 250 of 2,500+ teams | Samsung Innovation Campus Batch 6

Finalist | Rise The Ranger Cyber Competition 2025

Finalist | ITFest CTF 2026, Institut Pertanian Bogor

SKILLS

Security: Digital forensics, reverse engineering, web exploitation, OSINT

Programming: Python, C, SQL | **Tools:** Wireshark, Ghidra, Autopsy, FTK Imager, VMware, Git, JADX

Languages: Indonesian (native), English (fluent)
